⚠️ Wire Fraud Risk — Email Spoofing Possible

$275M REAL ESTATE WIRE FRAUD (FBI IC3 2024)

12,368 COMPLAINTS FILED

$3.04B TOTAL BEC LOSSES

This domain does not have enforced DMARC protection. An attacker can send emails that appear to come from any address at this domain — including executives and escrow officers — without detection. Real estate transactions are the #1 wire fraud target in the United States. Correcting this vulnerability eliminates the most common attack vector and is now an ALTA baseline requirement.

DOMAIN HEALTH FINDINGS

CHECK	STATUS	VALUE FOUND	RISK
SPF Record	WARN	`v=spf1 include:amazonses.com ~all`	Spoofing risk — soft fail

CRM / IDX	WARN	No CRM detected	Manual lead management

01 Harden SPF to Hard Fail (-all) MED

Current SPF uses soft fail (~all). Change to hard fail (-all) to reject unauthorized senders.

```
v=spf1 include:amazonses.com -all
```

02 Enforce DMARC Policy HIGH

DMARC is published but set to p=none (monitoring only). Advance to p=quarantine then p=reject to block spoofed mail.

```
v=DMARC1; p=quarantine; adkim=r; aspf=r; rua=mailto:dmarc_rua@onsecureserver.net;
→ After 30 days without issues, change to p=reject
```

03 Install Analytics Tracking MED

No analytics detected. Install Google Analytics 4 (GA4) to track visitors, leads, and conversion performance.

```
https://analytics.google.com/ → Create Property → Get tracking code
Add <script> tag to site <head>
```

04 Integrate CRM / Lead Capture LOW

No CRM integration detected. A CRM (kvCORE, Follow Up Boss, Sierra) automates lead routing and follow-up.

```
Recommended for small realty teams: kvCORE or Follow Up Boss
Integrate IDX feed for live MLS listings + lead capture forms
```
