⚠ Wire Fraud Risk — Email Spoofing Possible

$275M REAL ESTATE WIRE FRAUD (FBI IC3 2024)

12,368 COMPLAINTS FILED

$3.04B TOTAL BEC LOSSES

This domain does not have enforced DMARC protection. An attacker can send emails that appear to come from any address at this domain — including executives and escrow officers — without detection. Real estate transactions are the #1 wire fraud target in the United States. Correcting this vulnerability eliminates the most common attack vector and is now an ALTA baseline requirement.

DOMAIN HEALTH FINDINGS

CHECK	STATUS	VALUE FOUND	RISK
SPF Record	FAIL	Not found	HIGH — email spoofing enabled
DMARC Policy	FAIL	Not found	CRITICAL — no domain protection
DKIM	WARN	Not detected via TXT scan	May affect deliverability
MX Records	FAIL	None found	No email infrastructure
SSL Certificate	WARN	Could not verify (CORS)	Site may lack HTTPS
XML Sitemap	WARN	Not found	Reduced SEO indexing
Analytics	WARN	Not detected	No conversion tracking
CRM / IDX	WARN	No CRM detected	Manual lead management

01 Publish SPF Record HIGH

Add an SPF TXT record to your DNS zone to specify which mail servers are authorized to send email for this domain.

```
v=spf1 include:_spf.google.com ~all
→ Upgrade to -all once confirmed working
```

02 Publish DMARC Record HIGH

Add a DMARC TXT record at _dmarc.[domain]. Start with p=none to collect reports, then advance to quarantine/reject.

```
Host: _dmarc.mallachandcompany@gmail.com
Value: v=DMARC1; p=none; rua=mailto:dmarc-reports@mallachandcompany@gmail.com; ruf=mailto:dmarc-reports@mallachandcompany@gmail.co
m; fo=1
```

03 Enable SSL / HTTPS HIGH

The site does not appear to be serving HTTPS. Contact your hosting provider to install a TLS certificate (Let's Encrypt is free).

```
Most hosts: cPanel → SSL/TLS → Install Certificate
Or enable AutoSSL / Let's Encrypt in your hosting panel.
```

04 Generate XML Sitemap MED

A sitemap helps Google index all pages of your website. Most website platforms can generate one automatically.

```
WordPress: install Yoast SEO → SEO → General → Features → Enable Sitemap
Squarespace: Settings → Advanced → URL Mappings → Auto-sitemap
```

05 Install Analytics Tracking MED

No analytics detected. Install Google Analytics 4 (GA4) to track visitors, leads, and conversion performance.

```
https://analytics.google.com/ → Create Property → Get tracking code
Add <script> tag to site <head>
```

06 Integrate CRM / Lead Capture LOW

No CRM integration detected. A CRM (kvCORE, Follow Up Boss, Sierra) automates lead routing and follow-up.

```
Recommended for small realty teams: kvCORE or Follow Up Boss
Integrate IDX feed for live MLS listings + lead capture forms
```
