⚠️ Wire Fraud Risk — Email Spoofing Possible

$275M REAL ESTATE WIRE FRAUD (FBI IC3 2024)

12,368 COMPLAINTS FILED

$3.04B TOTAL BEC LOSSES

This domain does not have enforced DMARC protection. An attacker can send emails that appear to come from any address at this domain — including executives and escrow officers — without detection. Real estate transactions are the #1 wire fraud target in the United States. Correcting this vulnerability eliminates the most common attack vector and is now an ALTA baseline requirement.

DOMAIN HEALTH FINDINGS

CHECK	STATUS	VALUE FOUND	RISK
SPF Record	WARN	`v=spf1 include:_spf.google.com ~all`	Spoofing risk — soft fail
DMARC Policy	FAIL	`Not found`	CRITICAL — no domain protection
DKIM	WARN	`Not detected via TXT scan`	May affect deliverability
MX Records	PASS	`1 ASPMX.L.GOOGLE.com., 10 ALT3.ASPMX.L.GOOGLE.com.`	None
SSL Certificate	PASS	`HTTPS reachable`	None
XML Sitemap	WARN	`Not found`	Reduced SEO indexing
Analytics	WARN	`Not detected`	No conversion tracking
CRM / IDX	WARN	`No CRM detected`	Manual lead management

01 Harden SPF to Hard Fail (-all) MED

Current SPF uses soft fail (~all). Change to hard fail (-all) to reject unauthorized senders.

```
v=spf1 include:_spf.google.com -all
```

02 Publish DMARC Record HIGH

Add a DMARC TXT record at _dmarc.[domain]. Start with p=none to collect reports, then advance to quarantine/reject.

```
Host: _dmarc.hoydenhomes.com
Value: v=DMARC1; p=none; rua=mailto:dmarc-reports@hoydenhomes.com; ruf=mailto:dmarc-reports@hoydenhomes.co
m; fo=1
```

03 Generate XML Sitemap MED

A sitemap helps Google index all pages of your website. Most website platforms can generate one automatically.

```
WordPress: install Yoast SEO → SEO → General → Features → Enable Sitemap
Squarespace: Settings → Advanced → URL Mappings → Auto-sitemap
```

04 Install Analytics Tracking MED

No analytics detected. Install Google Analytics 4 (GA4) to track visitors, leads, and conversion performance.

```
https://analytics.google.com/ → Create Property → Get tracking code
Add <script> tag to site <head>
```

05 Integrate CRM / Lead Capture LOW

No CRM integration detected. A CRM (kvCORE, Follow Up Boss, Sierra) automates lead routing and follow-up.

```
Recommended for small realty teams: kvCORE or Follow Up Boss
Integrate IDX feed for live MLS listings + lead capture forms
```
